

BUNKERKIT[®] BANK

Your modular secure room.

Our products

- 1 Bunkerkit[®] (ATM)
- 2 Bunkerkit[®] (Counter)
- 3 Bunkerkit[®] Outside
- 4 Portakit
- 5 Portabank
- 6 Security sliding door
- 7 Bollards (against ram-raid)

An Innovative Concept

The BunkerKit® is a safe room providing **exclusive protection** against theft and intrusion. Our new well-designed concept developed by engineers from MetalQuartz **secures valuables and individuals** alike.

Our concept is simple: the Bunkerkit® is made of **vertical panels, ceiling elements and floor armoured steel** which are assembled in a unique way into a standalone unit.

The installation of our BunkerKit® is performed by our **qualified partners** and can be supervised by a **certified organization**. No need for welding on site or binding in existing walls.

The key innovation is the **MODULARITY** of our BunkerKit®. Our customers can install **quickly and easily** a safe room, **inside or outside** their facilities, with or without floor, to meet their particular needs.

Your Key Benefits

- **Modular Kit**
 - Money-saver
 - Time-saver
 - Suitable for your specific locations and circumstances
 - Lightness
 - Ease of handling
 - Quick installation
 - No limitations of the number of assembly / disassembly
- **Effective protection features**
 - Armour plating
 - Burglar resistance
 - Bullet-proof unit
- **Approved by the banking sector**
- **European standards certifications**

Our Certificates

Burglar resistance

Our Bunkerkit® safe room complies with EN 1627-1630 level 4. It's burglar-resistant. These standards consist of a classification system into six categories (1 through 6 in increased burglar resistance) and describe test methods used to assess the resistance of these elements under static, dynamic as well as break-ins conditions.

Ballistic protection

Our Bunkerkit® meets FB1 to FB7 and Kalashnikov levels in accordance with European standards EN1522-1523. Our Bunkerkit® also received positive test reports from the Brussels Royal Military School's Laboratory of the Chair of Military and Ballistics.

Fincertif

Our BunkerKit® fully meets the Belgian Fincertif banking standard MB/E3 level. Standards and specifications FINCERTIF «Mechanical and Building Protection» describes the tests achieved by ANPI on panels and doors based on simulations of burglary attacks.
